

Diffuser Specialist

Specialty Sheet Conical De-Glaring Prism

General Description

CDP is a high-transparent and micro-structured prism surface that provides a unique de-glaring in the plane of the sheet. Prisms are established as cones, optimised by numerical algorithms. High efficiency, smooth de-glaring with opal appearance are the key features of this product. Grey colour material increases the de-glaring effect.

Application

The CDP is intended for applications in which high angle brightness cannot be tolerated.

Ordering Information

For samples, pricing and delivery please call 1.800.880.5483.

Notice

Diffuser Specialist assumes no responsibility for suitability of luminaires and applications. The use of lenses near and above 70°C temperatures with high UV output light sources will cause degradation of the material.

CDP

Conical De-Glaring Prism

Premium compression molded acrylic sheet

Material:
PMMA Clear Acrylic

0.118" thicknesses
92% transmittance
Standard size: 23.62" x 47.24"
Max Temp: 70°C
Custom cuts available
