Aluminum SBL Parabolic Baffle

SBL:

A versatile, attractive and functional linear baffle. The SBL is an aluminum parabolic lighting baffle with a trimmable flange. It features up to a 1-1/2" flange on both sides which allows trimming up to 2-1/2" of width. Available in semi-specular silver finish with 2" or 3" blade spacing. Ideal for new and retrofit projects where linear lighting is required.

Features & Benefits

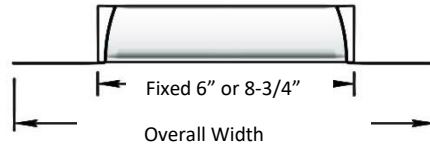

- Straight blade baffles provide 45° shielding along parallel axis
- SBL has a 1-1/2" trimmable flange
- Allows variety of looks
- Attractive appearance
- Great efficiency
-

Applications

For use with perimeter, accent and corridor lighting.
